Core Capabilities

Digital Modernization

Enterprise IT Services

Professional Services

Sector We Serve

Health & Human Services

Aviation & Transportation

Finance & Administration

Public Safety

Information Technology

Utilities

Municipalities

"I am incredibly grateful to vTech for their invaluable support in helping us develop a platform to code client commitment language. From navigating procurement processes to software maintenance, vTech's team went above and beyond. Thanks to whole team for their outstanding work on the initial platform and for accommodating our numerous requests with speed, grace, and fairness. Communication throughout was excellent, and we couldn't be happier with the final product. Thank you, vTech, and we eagerly anticipate collaborating on future projects!"

-Andy Frey, Professor at (University of Missouri-Columbia)

1100 H St NW, STE 850,

Past Performance

Judicial Council of California: Awarded a master agreement to deliver enterprise architecture, cybersecurity, cloud engineering, and integration services statewide.

Maryland Department of Human Services: Established a 24/7 Security Operations Center and deployed cloud-based threat detection, reducing incident response time by 30% and enhancing cybersecurity compliance across human services programs.

Illinois Department of Innovation & Technology: Deployed senior IT consultants to lead enterprise DevOps, support application modernization, and integrate systems across statewide agencies.

DC Health (District of Columbia Department of Health): Delivered critical staffing for performance management and data analytics teams, including program analysts and IT project support roles, enabling improved public health operations.

Florida Department of Transportation: Conducted enterprise-wide cloud security assessments and implemented compliance remediation strategies to meet state and federal cybersecurity mandates.

DC Water: Upgraded the public website from Drupal 7 to Drupal 10, enhancing performance, ADA compliance, and mobile responsiveness. Delivered full content migration, custom module development, and internal team training.

Virginia Department of Corrections: Provided application modernization, infrastructure enhancement, and technical staffing to support digital transformation across public safety and rehabilitation programs.

North Central Texas Council of Governments – TXShare DBITS Contract: Delivers project-based IT services including Business Intelligence, application development, technology assessments, and PMO support to public-sector entities across Texas.

New York Power Authority: Delivered specialized IT and energy-sector staffing to support renewable energy initiatives, cybersecurity expansion, and electric vehicle infrastructure programs.

Commonwealth of Pennsylvania – ITQ Master Contract: Pre-qualified vendor supporting agencies such as PennDOT, Department of Revenue, and DCED with specialized IT staff in workstation support, architecture, systems engineering, and help desk services.
